

Creating sustainable urban spaces

Sustainability programme 2023-2025

ENVIRONMENT

Our properties make a difference

We are creating the net-zero buildings of the future by increasing energy efficiency and reducing emissions together with our partners. We look for ways to increase circularity and biodiversity in urban spaces.

SOCIETY

Spaces bring us together

Our properties are the cornerstones of a safe, healthy, and sustainable community. We make daily sustainability actions easy for our tenants and promote active collaboration.

EMPLOYEES

People make it happen

We put the health, safety, and wellbeing of our employees first. Our people can grow in an open and inclusive working culture.

GOVERNANCE

Building on a progressive foundation

We are a sustainability leader in our sector. We develop sustainable practices and strive to safeguard human rights together with our partners.
