

Sponda's Climate Roadmap Targets

Annual energy efficiency measures and renewable energy projects

The goal of Sponda's Energy Efficiency Programme is to reduce the energy consumption of properties by 20% by 2030 from the level of 2016-2018. Every year, this means 2% savings in energy consumption.

We increase the production of renewable energy, such as solar power in our properties every year.

We develop low-carbon construction solutions and take into account the environmental impacts of the entire life cycle of a property.
